**FOREX WOOD GROUP** is a Canadian based company specializing in the sawing and distribution of hardwood products sold in either green or dry condition per demand, all lengths and thicknesses combined.

Combining the advantages of **high capacity production** while maintaining the **flexibility** of small-scale production for very specific products.

Our distribution points are **strategically located in both Canada and the United-States (NY)** and give us an **competitive edge** over exporting our products on international markets.

Forex Wood Group ensures a **high-quality** wood product with **exceptional consistency**. The qualities and the dimension's blocks are adapted per the industrial application of the customer in:

- Oil, Mining,
- Forestry,
- Maritime,
- Transport,

- Heavy Rigging or Energy Distribution
- Architecture
- Wooden Structure

The **custom sizes** timber blocks can be:

- in standard dimension, ranging from 3" X 4" to 20" X 20" ;
- Standard length of 8' to 25' ;
- Non-Standard length as long as 35'.

Our **24-hour emergency service**, for our industrial customers and our delivery time, can be as short as **48 hours, delivered on site**, is what make us not only a supplier, but a partner, in your business.

We also ensure a high availability as well as prices more than competitive and this **without minimum order quantity**.
